Waste Reduction

As required in 40 CFR 262.56(a)(5) and 40 CFR 262.87(a)(5), Except for hazardous waste produced by exporters of greater than 100 kg but less than 1000 kg in a calendar month, unless provided pursuant to §262.41 [biennial report], when submitting in even numbered years:

<p>(i) A description of the efforts undertaken during the year to reduce the volume and toxicity of waste generated:</p>	<p>EEl is a commercial TSDF with industrial classification NAICS code 562211. The amount of waste generated by EEl is directly related to the amount and type of wastes received by EEl from offsite. The opportunity for waste minimization is therefore limited, depending on these factors. EEl is constantly evaluating all areas of the operations for pollution prevention opportunities and have implemented many procedures to reduce the amount of waste generated. During the past year the most significant waste minimization change we made was to recycle the plastic bags that waste aerosol cans were shipped to EEl in. This reduced the amount of waste going to landfill by 15 cubic yards per week.</p>
<p>(ii) A description of the changes in volume and toxicity of waste actually achieved during the year in comparison to previous years to the extent such information is available for years prior to 1984:</p>	<p>Changes in volume of toxicity of wastes actually received were comparable to previous years.</p>
